ABOUT ME

Hello, I'm Nam, a passionate frontend developer skilled in JavaScript, TypeScript, ReactJS, and database management. I'm currently broadening my expertise to include backend technologies with the goal of becoming a Full Stack Developer. I'm looking for a permanent role where I can apply my skills, learn continuously, and contribute to the growth of the company. My ultimate aim is to grow into a senior position with a strong grasp of full-stack web development.

WORK EXPERIENCE

AVEPOINT

05/2023 - PRESENT

Software Developer

- Develop and maintain web modules using React, TypeScript, and Redux Toolkit.
- Collaborate closely with the backend team to integrate and test RESTful APIs.
- Improve UI/UX consistency and optimize frontend performance.
- Refactor components and implement state management best practices.

RECENT PROJECTS

TYGRAPH PRODUCT

09/2022 - PRESENT

- Customer: Germany, Canada
- Description: An analytics platform for Microsoft 365, providing insights into user engagement and productivity. Features customizable dashboards and real-time data visualizations using Recharts and Redux, with secure authentication and global data compliance.
- Team size: 12
- My position: Developer
- Technologies used: React, TypeScript, Redux Toolkit, Recharts, C#, MS SQL Server, KustoQL
- Link reference: <https://tygraph.sharepointguild.com>

PERSONAL PORTFOLIO WEBSITE

10/2024 - PRESENT

- Developed with React, TypeScript, and Ant Design
- Built a responsive portfolio website to showcase my work and skills.
- Implemented form validation and submission features using EmailJS.
- Hosted the project on Vercel with CI/CD pipeline for seamless updates.
- Link reference: <https://portfolio-page-omega-self.vercel.app/>

HOBBIES

- Gym, music, exploring new technologies, gaming

SHAREBLOG WEBSITE

03/2022 - 05/2022

- Customer: Individual
- Description: A blogging platform enabling users to post, edit, and interact with content on technology and lifestyle topics. Key features include CRUD operations, likes, comments, and tag-based search with JWT and OTP authentication.
- Team size: 1
- My position: Developer
- Technologies used: ReactJS, Redux, HTML5, CSS3, Node.js, Express, MongoDB
- Link reference: <http://3.25.116.188/> or <http://shareblog.tech/>
